LEGOLAND®

CULTIVA TU DON DE HACER FLORECER LA CREATIVIDAD

🪴 "Estas humildes pero prolíficas macetas de terracota son la incorporación más reciente a nuestra colección LEGO® Botanical: tres grupos de plantas tan emblemáticas como exóticas miniaturizadas para llevar el clásico encanto de LEGO a tu hogar. Esta vibrante mezcla de especies vegetales incluye desde plantas de interior que aman la humedad hasta suculentas que habitan en el desierto y peculiares especímenes carnívoros. Funciona como un grupo o en conjuntos más pequeños de tres que conservan su color y la diversión todo el año. Con instrucciones creadas para que te resulte fácil invitar a tus amigos o tus seres queridos a compartir la experiencia, ¡esperamos que disfrutéis juntos de vuestro jardín!".

THEO BONNER
Modelista de LEGO®

PLANTAS TROPICALES

Las selvas tropicales solo cubren alrededor del 6 % de la superficie de la Tierra, pero albergan casi dos tercios de todas las especies vegetales, incluidas múltiples plantas con propiedades medicinales utilizadas en el tratamiento de diversas enfermedades. La combinación de calor y humedad permite que prosperen miles de flores, árboles y arbustos tan vibrantes como exuberantes que sirven de refugio y alimento a animales y humanos por igual.

(Oxalis triangularis)

TRÉBOL PÚRPURA

Planta perenne originaria de Argentina, Bolivia, Brasil, Paraguay y Perú.

(Crassula ovata)

ÁRBOL DE JADE

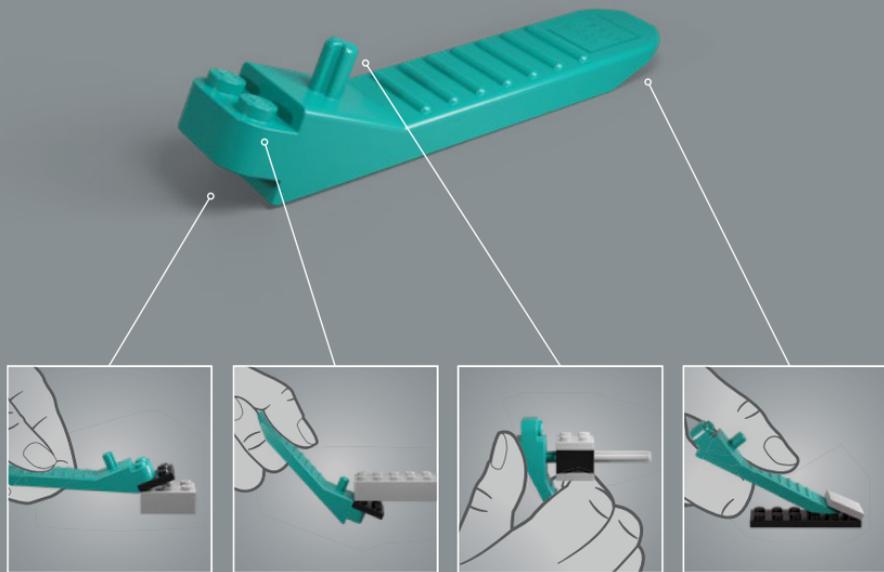

Una enorme suculenta originaria de Sudáfrica y Mozambique.

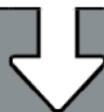

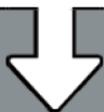

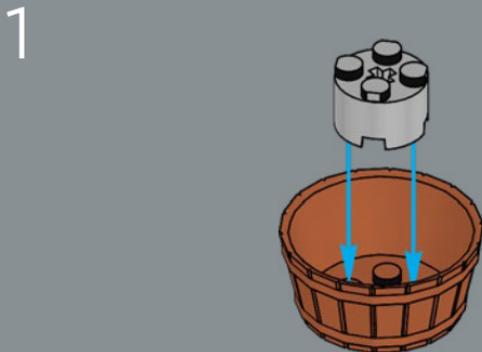

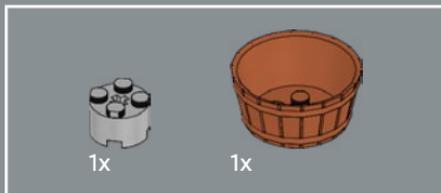

(Anthurium andraeanum)

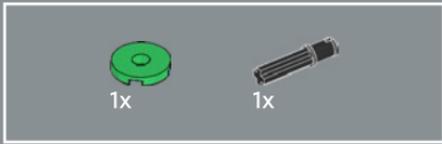

ANTURIO

Planta con flores originaria de Colombia y Ecuador.

A primera vista, el trébol púrpura podría confundirse con un gran grupo de mariposas, así que qué mejor manera de capturar el icónico aspecto de esta planta que utilizando mariposas LEGO® en un color totalmente nuevo.

¿Has pensado alguna vez en aprender el arte de cultivar bonsáis? Los árboles de jade crecen rápido y son muy adaptables. Además, puedes recortarlos a tu gusto con facilidad.

¡Extra! ¡Extra! ¡Gran exclusiva! ¡Boina plana en un nuevo color!
Para reproducir las gruesas hojas del árbol de jade, usamos ocho boinas planas LEGO® vistas por primera vez en la minifigura LEGO coleccionable del Chico de los Periódicos.

Los anturios son vulnerables a plagas como los pulgones y los ácaros, así que tener una mariquita hambrienta en la maceta es una buena forma de mantener sana tu planta.

17

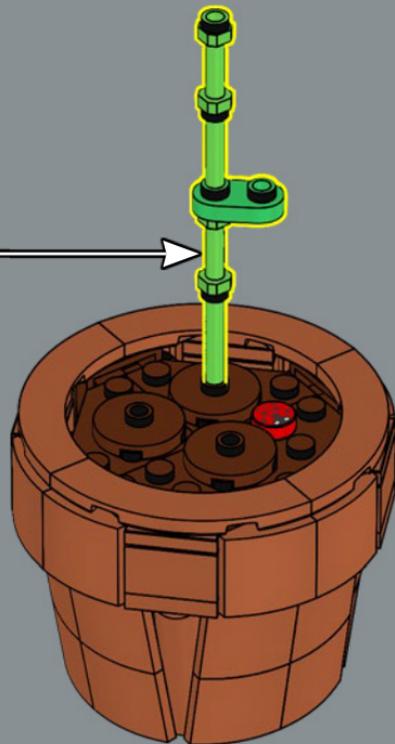

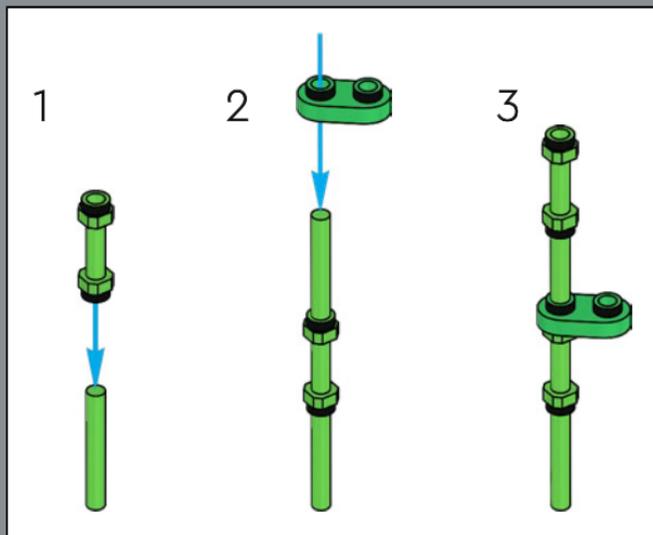

18

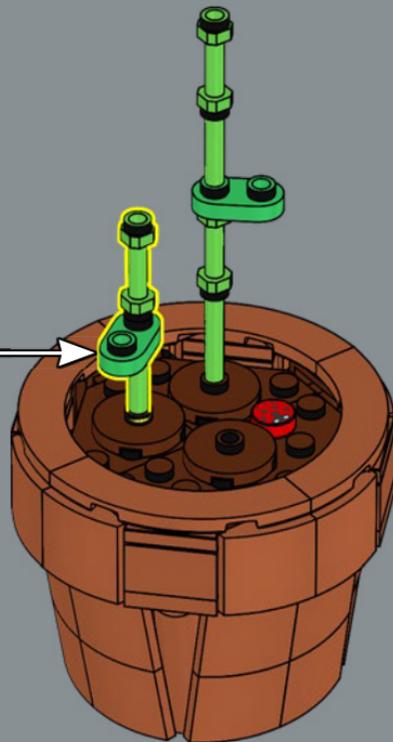

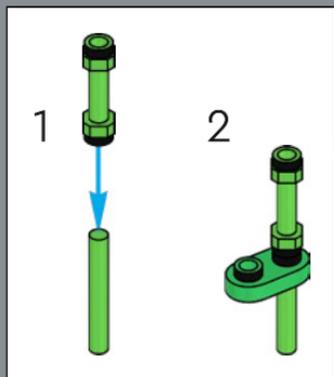

19

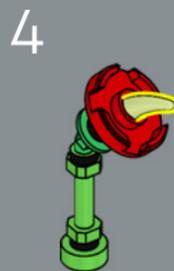

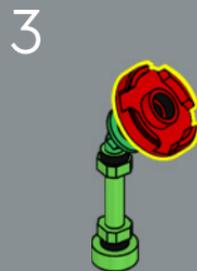

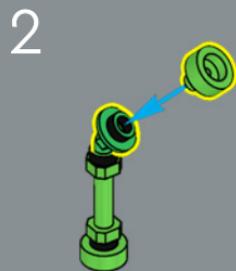

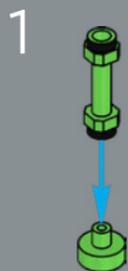

20

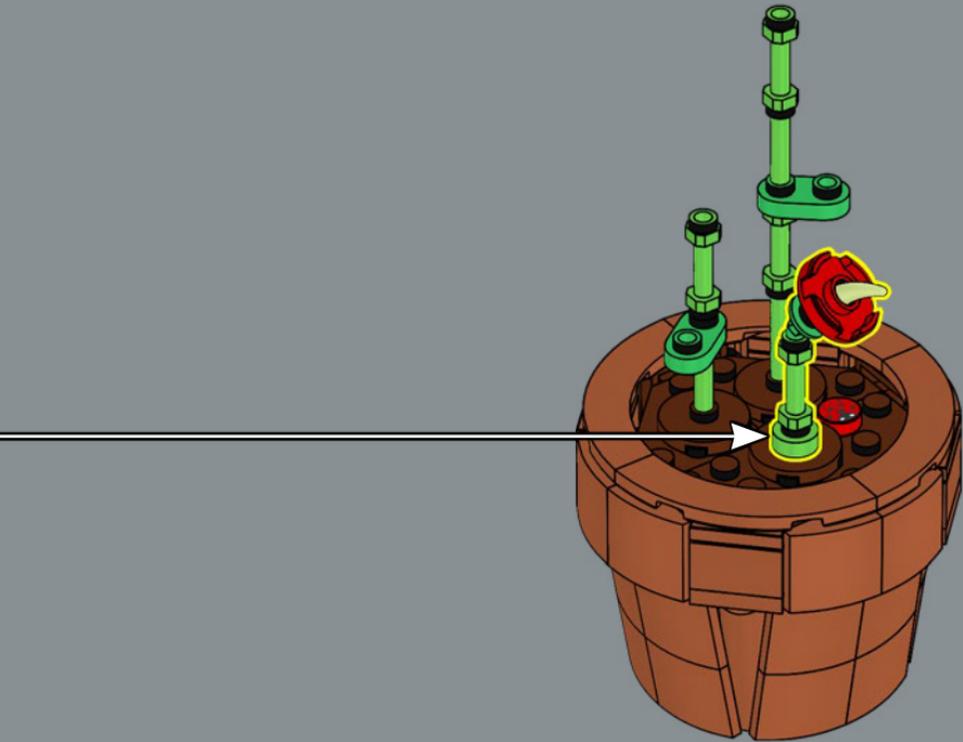

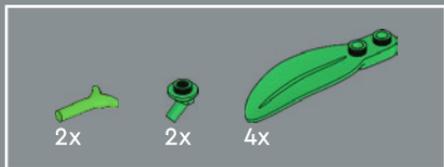

También es posible que conozcas los anturios por alguno de sus muchos otros nombres como, por ejemplo, flor de flamenco o paleta de pintor. ¡Nos encantan esas aliteraciones!
