

## PIANTE DEL DESERTO

Le piante delle zone aride o del deserto sono alcune delle specie più resilienti in circolazione. Si sono evolute per sopravvivere in zone climatiche con venti forti, caldo intenso e precipitazioni sporadiche. Solitamente, immagazzinano la poca umidità che riescono ad attirare in baccelli carnosì e la conservano per dissetarsi durante i lunghi periodi di siccità. I fiori molto colorati aiutano ad attirare gli impollinatori, dando loro un vantaggio competitivo sulle altre specie nell'ambiente circostante.

*(Dudleya brittonii)*

**GESSO DUDLEYA**

Una pianta grassa originaria della Bassa California, in Messico.

*(Opuntia humifusa)*

**FICO D'INDIA NANO**

Un cactus originario degli Stati Uniti orientali e del Messico nord-orientale.

*(Mammillaria crinita  
f. zeilmanniana)*

**CACTUS PUNTASPILLI**

Originario del Messico e delle aree degli Stati Uniti sud-occidentali, dei Caraibi e del Sud America.

Questa succulenta colorata prende il nome da Nathaniel Lord Britton, un botanico americano che per primo classificò il genere *Dudleya*.

Per catturare la bella sfumatura delle foglie appuntite, abbiamo aggiunto un nuovo colore per la base 1x1 con un dente. Quindi, se hai degli animali LEGO® in casa, potresti sempre regalare loro dei bellissimi denti color lavanda!

Le tessere rotonde stampate 2x2 LEGO® sono in un nuovo colore verde sabbia e presentano una nuova divertente decorazione appuntita per catturare l'aspetto di un fico d'india nano.

15

16

17

Lo sapevi che il frutto del fico d'india è commestibile? E anche le grandi "palette" verdi. Assicurati solo di rimuovere le spine prima di mangiarle!

Diverse specie di cactus puntaspilli sviluppano un'attraente corona di fiori dai colori vivaci.

35

Dopo essere stata classificata per la prima volta alla fine degli anni '20, *Mammillaria crinata* f. *zeilmanniana* era una specie per lo più sconosciuta, finché non fu riscoperta nel 1988 in un'area ricca di canyon in Messico.
